

# In France, you can't fly above FL195\*

For safety : better stop climb at 5800m in the "LTA Alpes" Area

Check your map for other limitations

LTA Vanoise : FL175

LTA Belledune : FL145

LTA Verdon : FL135

LTA Vercors : FL125

LTA France : FL115

etc...

- Check your map carefully, and use it in flight
- Listen to the briefing for QNH and altitude values of the day for FL115, FL195, etc...
- Open your airbrakes before you reach the max FL
- Don't follow gliders they may be in contact with Control

(\* Flights above FL195 are only permitted in R180 and R173 Restricted Areas, with special conditions)
